Because each truck manufacturer may implement differing feature sets (examples may include selectable ACC following distance, pass assistance and optional LDW audible mute for team driving scenarios) of the Bendix Fusion system over time, please check with your OE or dealer – and read the Fusion 3 Operator's Manual (BW8190) and Challenging Scenarios (BW8107) – available online at B2Bendix.com – to learn more about the features and performance capabilities, including system limitations, available on your vehicle.

Bendix safety technologies, including Bendix Fusion, complement safe driving practices. No commercial vehicle safety technology replaces a skilled, alert driver exercising safe driving techniques and proactive, comprehensive driver training. Responsibility for the safe operation of the vehicle remains with the driver at all times.

(SBH) Service Brake Hold.

Bendix Fusion™
