Red & Gray Tape – Traditional

5.75”

8”

Red & Gray Tape – Gen 6

Door Identification – Gen 6

The door end of the Gen 6 containers can be easily identified with the 3rd stripe of red reflective tape.

Note: If you come across a Gen 6 container that does not have the 3rd piece of red tape on the door end of the container, please apply a piece 4” above the bottom piece of red tape. If you come across a Gen 6 container that has a 3rd piece of tape mistakenly applied to the non-door end of the container, please remove.
